

PHOENIX DATA CENTER

120 East Van Buren Street Phoenix, AZ 85004

Carpathia Hosting is a leading provider of enterprise managed hosting services supporting a worldwide customer base including government agencies, large enterprises and small-to-medium businesses in data centers across the United States.

Carpathia Hosting's Phoenix Data center has all the space and power an enterprise needs onsite, all within a convenient metropolitan Phoenix location. At over 380,000 square feet, with 108,000 square feet of raised floor space, the Phoenix facility has space available to handle all data center size requirements. In addition, the site has enterprise capacity secondary power and cooling capabilities. As a recently renovated site, it has a focus on efficiency and security with 24/7 security and biometric access points. Contact Carpathia Hosting today to learn more about the cost effective solutions available at the Phoenix Data Center.

MANAGED CLOUD SOLUTIONS

With the addition of cloud services in the Phoenix data center, Carpathia Hosting enterprise customers already in the data center can now benefit from cloud-based services without having to abandon their dedicated infrastructure. Carpathia's cloud platform is used to deliver a number of data center optimizations services, including cloud bursting, elastic computing and disaster recovery solutions. The Phoenix cloud deployment allows these and other services to be delivered with geographic diversity, enabling customers to be in production in any of Carpathia Hosting's northern Virginia facilities, while utilizing Phoenix as a disaster recovery (DR) location or vice-versa.
